Filling valve, pneumatically operated, Series NL1-SSV

- adjustable filling time
- Compressed air connection G 1/4
- Pipe connection
- suitable for ATEX

Version Poppet valve, Can be assembled into

blocks

Sealing principle Soft sealing

Certificates suitable for ATEX

0 ... 16 bar Working pressure min./max. Control pressure min./max. 2,5 ... 16 bar Ambient temperature min./max. -10 ... 60 °C -10 ... 60 °C Medium temperature min./max.

Compressed air Neutral gases

Max. particle size 5 µm Weight 0,43 kg

Technical data

! † \ \ \ \	! † \ \\ - \ \\ \ \						
Part No.	Port	Flow					
		Qn					
0821300774	G 1/4	2200 l/min					

Technical information

The pressure dew point must be at least 15 °C under ambient and medium temperature and may not exceed 3 °C .

Builds up pressure slowly in the pneumatic systems, i.e. prevents a sudden pressure build-up during a restart after a mains pressure failure or avoids emergency OFF switching. This also avoids dangerous, jerky cylinder movements.

Do not position filling valves or filling units upstream of open consumers, such as nozzles, air barriers, air curtains, since these may prevent through connection of components.

Suitable for use in Ex zones 1, 2, 21, 22

A change in the flow direction (from air supply on the left to air supply on the right) occurs by rotating installation by 180° about the vertical axis. Please see the operating instructions for further details.

Technical information

Material			
Housing	Die cast zinc		
Front plate	Acrylonitrile butadiene styrene		
Seals	Acrylonitrile butadiene rubber		
Threaded bushing	Die cast zinc
