Technical data

Part No.		Port	Flow	Weight	
			Qn		
0821300936		G 1/2	4000 l/min	0,76 kg	1)
0821300935		G 1/2	4000 l/min	0,685 kg	2)

Nominal flow Qn with secondary pressure p2 = 6 bar at Δp = 1 bar

- 1) adjustable filling, Suitable for use in Ex zones 1, 2, 21, 22
- 2) Filling with fixed diaphragm, Suitable for use in Ex zones 1, 2, 21, 22

Technical information

The pressure dew point must be at least 15 °C under ambient and medium temperature and may not exceed 3 °C .

Builds up pressure slowly in the pneumatic systems, i.e. prevents a sudden pressure build-up during a restart after a mains pressure failure or avoids emergency OFF switching. This also avoids dangerous, jerky cylinder movements.

Do not position filling valves or filling units upstream of open consumers, such as nozzles, air barriers, air curtains, since these may prevent through connection of components.

Suitable for use in Ex zones 1, 2, 21, 22

A change in the flow direction (from air supply on the left to air supply on the right) occurs by rotating installation by 180° about the vertical axis. Please see the operating instructions for further details.
