Filling valve, electrically operated, series AS5-SSV

- adjustable filling time and change-over pressure, Electr. connection: valve plug connector M12x1

- Compressed air connection G 3/4

Version Poppet valve with elect. priority circuit, Can be assembled into blocks

Sealing principle Soft sealing 2,5 ... 10 bar Working pressure min./max. -10 ... 50 °C Ambient temperature min./max. -10 ... 50 °C Medium temperature min./max.

Medium Compressed air Neutral gases

Max. particle size 25 µm 100 % Duty cycle IP65 Protection class according to EN 60529:2000, without electrical connector

Weight 0,43 kg

Technical data

1 / 1 / 1 / 1 / 1 / 1 / 1 / 1 / 1 / 1 /							
Part No.		Port	Flow				
			Qn				
R412009373		G 3/4	10000 l/min				
R412009374		G 1	10000 l/min				

Technical information

The pressure dew point must be at least 15 °C under ambient and medium temperature and may not exceed 3 °C.

Builds up pressure slowly in the pneumatic systems, i.e. prevents a sudden pressure build-up during a restart after a mains pressure failure or avoids emergency OFF switching. This also avoids dangerous, jerky cylinder movements.

Actuating the electric priority circuit disrupts the slow pressure build-up and pressure p1 is immediately applied.

Do not position filling valves or filling units upstream of open consumers, such as nozzles, air barriers, air curtains, since these may prevent through connection of components.

A change in the flow direction (from air supply on the left to air supply on the right) occurs by rotating installation by 180° about the vertical axis. Please see the operating instructions for further details.

Technical information

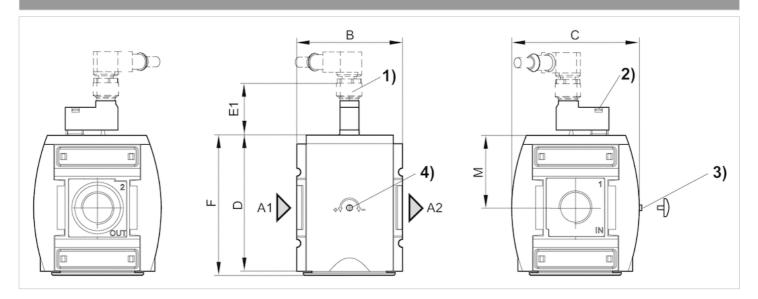

Material						
Housing	Polyamide					
Front plate	Acrylonitrile butadiene styrene					
Seals	Acrylonitrile butadiene rubber					
Threaded bushing	Die cast zinc
