5/2-directional valve, Series 581, size 3

- ISO 5599-1
- ISO 3
- 5/2
- With spring return
- Qn = 4800 l/min
- Compressed air connection output Base plate ISO 5599-1
- suitable for ATEX

Version Spool valve basic valve with electrical connector Pilot Sealing principle Blocking principle Connection type Standards ATEX class G ATEX class D Working pressure min./max. Control pressure min./max. Ambient temperature min./max. Medium temperature min./max. Medium Max. particle size 50 µm Oil content of compressed air Nominal flow Qn 4800 l/min Flow conductance C Protection class with connection IP65 100 % Duty cycle Mounting screw Mounting screw tightening torque 10 Nm Weight 0,85 kg

Basic valve without pilot valve external internal Soft sealing Single base plate principle Plate connection ISO 5599-1, ISO 3 2G Ex mb II T4 2D Ex tD A21 T130°C -0,95 ... 16 bar 3 ... 16 bar -20 ... 70 °C -20 ... 70 °C Compressed air 0 ... 5 mg/m³ 18,9 l/(s*bar) with hexagon socket

Technical data

Part No.		Throttle
5813180000		-
5813181000	$\mathbb{E}\left[\frac{41}{5} \left \frac{2}{15} \right]_{\text{H}}^2\right]_{\text{H}}$	with throttle

Nominal flow Qn at 6 bar and $\Delta p = 1$ bar, An operating pressure of up to 16 bar is possible in the version with manual override without detent., Internal pilot: min./max. operating pressure is the same as min./max. control pressure

The min. control pressure must be adhered to, since otherwise faulty switching and valve failure may result!

The pressure dew point must be at least 15 °C under ambient and medium temperature and may not exceed 3 °C .

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in the MediaCentre).

* Note: ATEX version can be produced by combining the basic valve without coil with a series DO30 CNOMO pilot valve and an ATEX coil.ATEX ID: see ATEX coils catalog page.
