# 5/3-directional valve, Series 581, size 2

- Qn = 2100 l/min
- Plate connection
- Compressed air connection output Base plate ISO 5599-1
- Can be assembled into blocks
- suitable for ATEX

Version

Blocking principle Sealing principle ATEX class G ATEX class D Connection type

Nominal flow Qn

Standards

Compressed air connection Working pressure min./max. Control pressure min./max. Ambient temperature min./max.

Medium

Max. particle size

Oil content of compressed air

Medium temperature min./max.

Mounting screw

Mounting screw tightening torque

Weight

Spool valve

Single base plate principle

Soft sealing 2G Ex mb II T4 2D Ex tD A21 T130°C

Plate connection ISO 5599-1, ISO 2

2100 l/min

Base plate ISO 5599-1

5812731000	34 M 13 M 12	pressurized center	9,6 l/(s*bar)	with throttle	suitable for ATEX

Nominal flow Qn at 6 bar and  $\Delta p = 1$  bar

#### Technical information

The min. control pressure must be adhered to, since otherwise faulty switching and valve failure may result!

The pressure dew point must be at least 15 °C under ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in the MediaCentre).
